Evan Warner

Senior Software Engineer

Noblesville, IN · (317) 412-4450 · evan.t.warner@gmail.com · https://evan-warner.com

SUMMARY

Expert in Python and TypeScript with proven leadership in architecting resilient applications, driving technical strategy, and mentoring engineers. Senior full stack software engineer building production systems focusing on full-stack applications and geospatial data analysis.

SKILLS

Languages & Frameworks: Python, FastAPI, Flask, TypeScript, NodeJS, React, Svelte, PHP, SQL

Backend & Databases: REST APIs, Database Design & Optimization, PostgreSQL, Microsoft SQL Server, GraphQL

Infrastructure: Docker, Linux Server Administration, Apache, GitHub Actions, Kafka

Architecture & Design: System Architecture, Microservices, Event-Driven Systems, API design

Tools & Practices: Technical Documentation, CI/CD, Code Review, Git/GitHub, Mentorship

EXPERIENCE

Senior Software Engineer, Bayer Crop Science — Sep 2022 – Present

Remote

- Integrated multi-source data pipelines connecting REST APIs, GraphQL endpoints, and BigQuery warehouses, enabling real-time decision-making across warehouse operations
- Architected and deployed mission-critical full-stack applications supporting two automated seed warehouse operations, including user interfaces, RESTful APIs, database procedures, processing services, and PostgreSQL databases
- Created AI/LLM powered features, along with using AI tools such as Cursor and Claude Code as an output multiplier
- Owned end-to-end product roadmap for two automated seed warehouse applications. Defined priorities in collaboration with operations stakeholders, features vs delivery timelines, and driving alignment across engineering and business teams.
- Led technical design for high-throughput transaction systems through robust error handling, retry mechanisms, and comprehensive monitoring

Full Stack Software Engineer, Bayer Crop Science — Dec 2019 – Sep 2022

Remote

- Engineered backend services using object-oriented design and enterprise patterns, handling thousands of concurrent requests per hour with sub-second response times
- Debugged complex distributed systems issues across multiple services and data sources
- Modernized legacy applications through strategic refactoring and technology upgrades, improving maintainability and enabling new feature development

Application Developer & GIS Specialist, ATOS North America - City of Fort Wayne — Oct 2018 – Nov 2019

Fort Wayne, IN

- Owned requirements gathering and solution design for automated Python applications serving Fort Wayne City Utilities, including data validation pipelines, automated reporting systems, and database monitoring tools that eliminated manual processes.
- Developed automated Python applications for Fort Wayne City Utilities, implementing data validation pipelines, automated reporting systems, and database monitoring tools that eliminated manual processes
- Led technical feasibility assessments and effort estimation for new projects, collaborating with city stakeholders to align on scope, timelines, and success criteria before development began.

GIS Specialist, Tippecanoe County Surveyor's Office — Oct 2013 – Oct 2018

Lafayette, IN

- Built Python automation tools for geospatial data processing, substantially reducing manual data entry and improving data accuracy through programmatic validation
- Architected and maintained county-wide geodatabases supporting land records, infrastructure management, and public services

PROJECTS

catholichabits.com · Co-Founder, Lead Engineer — 2024

- Built on Python, Svelte, TypeScript, PostgreSQL, and Redis; containerized with Docker and deployed on Linux via GitHub Actions
- Sole engineer and technical co-founder; designed and shipped a full-stack SaaS app with real users in production
- Architected backend services including email queue processing, user progress tracking, and SendGrid integration
- Repository access available upon request

EDUCATION

Bachelor of Science, Agriculture · Geospatial Data Analysis (GIS) — 2009 – 2013

Purdue University · West Lafayette, IN
