EVAN WARNER
Senior Software Engineer | evan.t.warner@gmail.com | (317) 412-4450 | evan-warner.com | Noblesville, IN

Senior full stack engineer with 7+ years building production systems. Expert in Python and TypeScript with proven leadership in architecting resilient applications, driving technical strategy, and mentoring engineers. Specialized in distributed systems design, API architecture, and operational excellence. Track record of delivering high-impact solutions, and scaling systems to handle thousands of transactions per hour with high reliability.

TECHNICAL EXPERTISE

Languages & Frameworks: Python, Django, FastAPI, Flask, JavaScript/TypeScript, NodeJS, PHP, SQL
Backend & Databases: PostgreSQL, Microsoft SQL Server, REST APIs, GraphQL, BigQuery, Database Design & Optimization
Infrastructure: Docker, Linux Server Administration, Apache, GitHub Actions, Kafka
Architecture & Design: System Architecture, Microservices, Event-Driven Systems, High-Availability Design
Tools & Practices: Git/GitHub, CI/CD, Technical Documentation, Code Review, Mentorship

PROFESSIONAL EXPERIENCE

Senior Software Engineer
Bayer Crop Science | September 2022 - Present | Remote

- Architected and deployed mission-critical full-stack applications supporting two automated seed warehouse operations, including user interfaces, REST APIs, database procedures, processing services, and PostgreSQL databases
- Led technical design for high-throughput transaction systems through robust error handling, retry mechanisms, and comprehensive monitoring
- Drove operational excellence initiatives that significantly improved system reliability through systematic analysis, proactive monitoring, and strategic policy recommendations
- Integrated multi-source data pipelines connecting REST APIs, GraphQL endpoints, and BigQuery warehouses, enabling real-time decision-making across warehouse operations

Full Stack Software Engineer
Bayer Crop Science | December 2019 - September 2022 | Remote

- Engineered backend services using object-oriented design and enterprise patterns, handling thousands of concurrent requests per hour with sub-second response times
- Debugged complex distributed systems issues across multiple services and data sources
- Modernized legacy applications through strategic refactoring and technology upgrades, improving maintainability and enabling new feature development

Application Developer & GIS Specialist
ATOS North America - City of Fort Wayne | October 2018 - November 2019 | Fort Wayne, IN

- Developed automated Python applications for Fort Wayne City Utilities, implementing data validation pipelines, automated reporting systems, and database monitoring tools that eliminated manual processes
- Managed enterprise GIS infrastructure across multiple VMware servers, for critical mapping services supporting Fort Wayne Utilities office (water, storm sewer, sanitary sewer, rainfall monitoring, etc)
- Led technical feasibility assessments and effort estimation for new projects, ensuring realistic timelines and successful delivery

GIS Specialist
Tippecanoe County Surveyor's Office | October 2013 - October 2018 | Lafayette, IN

- Built Python automation tools for geospatial data processing, substantially reducing manual data entry and improving data accuracy through programmatic validation
- Architected and maintained county-wide geodatabases supporting land records, infrastructure management, and public services

EDUCATION

Bachelor of Science in Agriculture
Focus on Geospatial Data Analysis (GIS)
Purdue University | West Lafayette, IN | 2009 - 2013
